

## Strong adhesive type double coated tapes UT1015BU

Features

- Adhesive tape with lower environmental impact with UV curable manufacturing method (non solvent adhesive coating process).
- It has the adhesive power about twice G series (compared with our company), and it is suitable for bonding on plastic and a metallic side.
- It is possible to excel in heatproof, and to use it under the environment of 120°C.

| Main component               | Acrylic         |
|------------------------------|-----------------|
| Carrier                      | Nonwoven fabric |
| Color                        | Translucent     |
| Adhesive thickness (µm)      | About 150       |
| Release paper thickness (µm) | About 130       |
| Bonding strength (N/20mm) *  | 27              |
| St'd size (width & length)   | 480mm × 50m     |

\* 90° peeling strength

## Suitable use

■ It is suitable for the material bonding usage of plastic such as nameplates and front panels of electricity and an electronic equipment (ABS, PS, and acrylic resin, etc.) and the metals (aluminum and stainless steel plate, etc.).
